

VTC6-220 (6V 220AH/20HR) Deep Cycle Lead Carbon Battery

VTC series lead-carbon batteries use functional activated carbon and graphene as carbon materials, which are added to the negative plate of the battery to make lead carbon batteries have the advantages of both lead-acid batteries and super capacitors. It not only improves the ability of rapid charge and discharge, but also greatly prolongs the battery life. It is well suited for PS OC applications.

Applications

- Energy storage system
- Smart power grid and micro grids systems
- Hybrid energy storage system
- RV, golfcart and marine
- Off-grid solar systems

General Features

- Combines the characteristics of a lead acid battery and super capacitor
- Long cycle life design, excellent PSoC and cyclic performance
- High power output, rapid charging and discharging
- Unique grid and lead pasting design
- Extreme temperature tolerance

Dimensions & Weight
